

AFTERCARE INSTRUCTIONS

Do not wash your lashes for at least 24 hours after service

How to wash your lashes:

- Pump 1/4 of lash wash per eye on extensions
- Scrub foam wash with lash brush on lash line
- Rinse with water/blot with towel
- Fan dry with cool fan
- Brush dry extensions with lash wand

What to avoid:

- Do not use oil-free products around eyes (no heavy eye cream)
- No waterproof mascara or eyeliner (on extensions or bottom lashes)
- Keep a distance from high heat: blow dryers/ovens/BBQ flames/firepits
(Your extensions will singe)

Aftercare wash is available for purchase at JoviLash.com

Our natural lashes are made to collect all bacteria in the air from entering our eyes by blinking. We produce oils everyday on our skin, which causes buildup of bacteria, oils, dust, and extra dead skin cells.

- Buildup will break down extensions faster
- Clogged lash pores
- Bacteria: infections/lash mites
- Lash thinning: premature shedding

LASH FACTS

The average person has
90-120 natural lashes per eye.
Each eye can shed 2-3 lashes
per day.

1 Week = 21 lashes

2 Weeks = 42 lashes

3 Weeks = 63 lashes

Refills are recommended every 2-3 weeks.
Depends on each individual client.

To prevent premature shedding and promote healthy lash growth:

- Wash your lashes **2x** a day (morning & night) with recommended lash wash that is made for eyelash extensions even if you do not wear makeup.
- Do not use your face wash on your eyelash extensions.
- Your face wash has ingredients that is made only for the skin which will cause buildup on the extensions.
- Makeup users must remove makeup first then follow the steps on how to wash.
